2015 - 2017, Mississauga

- Prepare legal documents for clients for law clerks
- Managed bookkeeping for Trust/General Account entries using PC Law
- Prepare expense entries and reconcile accounts

PROJECTS

Tiny Shop

[React](#), [Node](#), [Vite](#), [Typescript](#), [MySql](#)

- Designed and developed Tiny Pokémon Shop, an e-commerce platform inspired by Amazon, after mastering backend development (Node.js and database design)
- Built the backend using Node.js, XAMPP, and phpMyAdmin (MySQL)
- Developed frontend using React Vite & Typescript
- Implemented features allowing users to register, purchase, and sell items
- Gained expertise in:
 - Debugging and optimizing code
 - Creating and reusing components with adaptable CSS
 - Utilizing hooks ([useState](#), [useEffect](#), [useRef](#)) and building custom hooks (e.g., for media queries, lerp, and clamp)
 - Managing props and callback functions for efficient component interaction
 - Animating with libraries like [React-Spring](#) and [MUI](#) to enhance user experience

Portfolio | lonelyfrog.ca

[React](#), [Typescript](#), [Vite](#), [React Spring](#)

- Showcases dynamic motion capabilities with React
- Selected Vite for faster processing speed and built-in development server.
- Researched and implemented animations using [React Spring](#) and [Motion](#)
- Features projects, tests, and content, including Tiny Shop
